The Beginner class focuses on the Pilates Basic Mat routine by learning each move in depth to progressively build your core strength. Stabilization before mobilization minimizes injuries, makes impossible moves possible, while bringing a deep understanding of how to use your core effectively for daily life routines and exercises.

We always start the term by learning the 5 basic principles of Pilates. Then we build all the exercises based upon those principles. By the end of the term you will understand how to move your body in the most effective and safe way. We will be working with many different apparatus from stretch bands to balance balls and weights. The results could include: being able to move your body on a simple mat in a way that you never thought you could, applying your knowledge about your body and movements to your favorite sport to improve performance, avoiding possible injuries in daily life and relieving (or sometimes eliminating) pain from past injuries.

\*Although this is an intermediate class, we will spend the first 2 weeks with slow and seemingly easy moves. But please be patient! The class will quickly progress to an intermediate and advanced level.
